Acrylic Latex BAA

Acrylic Latex Bonding Agent & Admixture

DESCRIPTION

Acrylic Latex BAA is a non re-emulsifiable, acrylic latex liquid bonding agent and admixture. **Acrylic Latex BAA** can be used as an admixture to enhance the performance properties of patching materials, grouts, mortars and cementitious coatings. **Acrylic Latex BAA** exhibits excellent resistance to freeze/thaw cycles and can be used for interior or exterior applications.

USES

- **Acrylic Latex BAA** is ideal for bonding new concrete to new concrete or new concrete to old concrete in interior or exterior applications. **Acrylic Latex BAA** is an acrylic polymer, water-based liquid specifically designed for use with cementitious compositions such as patching materials, grouts, masonry coatings, stucco coatings and masonry mortars to increase chemical resistance and performance.

BENEFITS

- Durable: Increase tensile strength, flexural strength and chemical resistance over non-modified mortars
- Curing: Increase water retention properties
- Excellent Bonding Agent: Superior adhesion properties
- Freeze/Thaw Resistance: Increased resistance to dramatic climatic changes

STANDARDS

Acrylic Latex BAA meets and exceeds the requirements of ASTM C1059, Type I and II for Latex Bonding Agents.

SURFACE PREPARATION

All surfaces in contact with **Acrylic Latex BAA** shall be free of dirt, oil, grease, laitance and other contaminants that may act as bondbreakers. All unsound concrete should be removed to ensure a good bond. Smooth, dense surfaces need to be mechanically abraded to provide necessary bonding requirements. If mechanical abrasion is needed refer to ICRI Guideline 310.2 for proper surface preparation methods. Substrate shall be dry. Always apply a test patch. Maintain contact areas between 40°F (4°C) and 90°F (32°C) prior to repair and during initial curing period.

MIXING

For best results, mix thoroughly before each use. Do not over agitate or use high speed mixing equipment. Stir **Acrylic Latex BAA** to a uniform blend when combined with water. When batching with **Acrylic Latex BAA**, always premix both the dry ingredients (sand and cement) and the wet ingredients separately. Next, slowly blend the dry ingredients into the wet ingredients to form a mortar of desired consistency.

PHYSICAL PROPERTIES

Complies with National Volatile Organic Compound Emission Standards.

Appearance	Milky White Liquid
Solids Content	25%
pH	5.1
Specific Gravity	1.1
Lbs / Gal	9.0
Freeze/Thaw Stable	Yes
Min. Film. Form	59°F (15°C)

PLACING

As a bonding agent for patching compounds, apply with a low pressure sprayer, brush or roller at a rate of 300 ft²/gal when diluted 1:1 with cool, clean potable water. A hand held pump sprayer or an airless industrial sprayer is acceptable. Apply evenly without puddling. Apply patch while **Acrylic Latex BAA** is still tacky.

STORAGE

Protect from freezing. Store material in an interior, cool, dry place above 40°F (4°C). Shelf life is one year in original, unopened container.

CLEAN-UP

Clean tools and equipment with warm, soapy water. After material has dried, it may be necessary to use solvents such as mineral spirits, toluene or xylene.

LIMITATIONS

In addition to the limitations already mentioned, please note the following. Do not apply when the surface or ambient temperature is below 40°F (4°C) or expected to fall below 40°F (4°C) within 48 hours. High humidity and excessive moisture will retard curing time of **Acrylic Latex BAA** modified mixes.

Packaging: 1 gal (3.8 L) jug, 5 gal (18.9 L) pail, 55 gal (207.9 L) drum

WARNING

May cause eye damage/irritation. May cause skin irritation. May cause respiratory irritation. Wear protective gloves and eye/face protection. Wash with plenty of water and soap thoroughly after handling. Avoid inhalation of vapors. Do not eat, drink or smoke when using this product. Use only outdoors or in a well ventilated area.

FIRST AID

If in eyes: rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: call a poison center or doctor/physician. If swallowed: contact a poison control center/doctor if you feel unwell. Rinse mouth. If on skin: wash with plenty of soap and water. If skin irritation or rash occurs, get medical advice. Take off contaminated clothing and wash it before reuse.

MANUFACTURER/TECHNICAL SERVICE

Exclusively manufactured for Janell Inc. by **US SPEC of Denver, CO.**

Contact your Janell representative for the most current product information. Always read and follow the warnings and instructions on the most current technical data sheets.
