Introducing American Construction Products and the RWB Family of Products

The RWB Family of Products is manufactured by US SPEC located in Denver, Co and Distributed by Janell, Inc. US SPEC is the concrete construction chemicals division of US MIX Co. US SPEC is an American owned and operated, cementitious products manufacturer. Since 1990, US SPEC has manufactured cementitious non-shrink grouts and concrete repair materials with a foundational commitment for product quality, service, ease-of-use and professionalism. Janell, Inc. is a distributor of concrete construction products with locations throughout the Midwest. Janell Inc., The supermarket for concrete accessories and masonry equipment® for over 50+ years. JANELL, INC., 6130 Cornell Rd., Cincinnati, OH 45242, 513-489-9111.

RWB Family of Products Product Performance

When working with structural repairs, product performance is paramount. US SPEC products are manufactured with the care and concern of a true craftsman. US SPEC is constantly dialing in best efforts on a daily basis. The product categories have been carefully crafted over years to offer only products related to core business segments. Core business segments include structural grout, concrete repair materials, and self-leveling materials. Each product is carefully formulated by their chemists and tested in both a conditioned laboratory as well as harsh practical environments to ensure our products meet their highest standards performing as designed in all environments prior to going to market.

Product Presentation

Janell Inc. and US SPEC take pride in every facet of their businesses. The products will look perfect upon arrival because no corners will be cut. Sharp graphics, clean/strong packaging, and durable pallets that are always wrapped and covered protecting the contents from moisture intrusion are characteristics you'll find. Collectively, Janell Inc. and US SPEC are proud to say our product presentation is second to none.

Research and Development

US SPEC's dedicated lab staff and chemists diligently research and formulate ways to improve our current products and, when necessary, formulate new ones. US SPEC is not a "me too" manufacturer. They specialize in what they know and do best; to produce a solid group of products we can lean on in complete confidence.

Additionally when formulating it is also important to focus on attributes secondary to performance such as aesthetics of the final application; color, finish, and texture are of vital importance.

Technical

US SPEC is adamant about continuous improvement and sees this taking place by rising to meet technical challenges and advancement. In doing so, US SPEC associates are active the International Concrete Repair Institute, the ASTM International, the American Segmental Bridge Institute, and the Post-Tensioning Institute. US SPEC has a full time Technical Director and full time Coordinator who aim to provide understandable content in the midst of technical jargon. US SPEC, 112 South Santa Fe Drive, Denver, CO 80223, 303-778-7227.
